General Peripherals & Devices Technology

INTRODUCTION

Since inception in 2008, **GPD Technology (GPD)** has been committed to providing high quality products, solutions and services in the area of Information and Communications Technology (ICT) in the United Arab Emirates.

Today, **GPD Technology** is a foremost provider of innovative and leading-edge technologies to fulfill the needs of Government, Corporate and Private Sectors. The company is especially active in Fleet Management Systems, Security & Surveillance, Access Control and Time Attendance, Personal and Asset Security...

As a leader in its fields, **GPD Technology** endeavors to embrace best Practice Methodologies and International Industry Standards at the core of every project executed.

Our commitment is to be highly attentive to our Customer satisfaction, work ethics, and strive towards persistent improvement in the quality of our services.

GPD STRATEGY

Vision: To be a leader in the Tracking and Security industry by offering quality solutions and enhanced services that meet and exceed the expectations of our client community.

Mission Statement: Maintain long term relationships with clients in Government, Corporate and Energy sectors and provide exceptional customer attention by pursuing business through innovation and advanced technologies.

Core Values:

- We believe in treating our customers with respect and faith
- We grow through creativity, invention and innovation
- We assimilate honesty, integrity and business ethics into our business conduct

Business Goals:

- Strive for regional expansion in our field activity. Develop a strong base of key customers
- Diversify offering portfolio and continually embrace new Technologies
- Increase the technical assets and R&D investments of the company to develop future proof solutions
- Strong reputation of a reliable/preferred partner and key player in the industry
- Grow through accumulating know-how and constantly acquiring Key Customers

Quality Policy: GPD is committed to:

- Deliver quality assured services related to vehicle monitoring system.
- Strive for continual improvement by setting quality objectives and regular performance monitoring with emphasis on Customer Satisfaction.
- Comply with all applicable statutory, regulatory and other civil requirements.
- Ensure that the quality policy is communicated to all interested parties
- Undertake to equip itself with the necessary certifications such as ISO

Competitiveness: GPD draws its competitive strengths from:

- Reliable, intuitive systems with strong focus on ease of use. Our solutions easily integrate with existing systems natively or via custom development
- High quality Hardware with a failure rate lower than 2%
- Our Servers in Europe are operated to Green Energy and Sustainability standards.
- Heavy R&D investment, constantly developing new and improving existing solutions
- Reliable after sales support
- Most competitive and flexible pricing

OUR TEAMS

With our highly motivated and skilled staff, **GPD** is ready to face future challenges. With extensive knowledge in GPS Tracking and Fleet Management Systems, RFID Technology for Security and Surveillance, as well as Access Control Solutions, **GPD Technology Teams** propelled the company into a leadership position.

Our Engineers, Technicians and Business Developers work hand in hand to achieve the ultimate **Quality** goal in project execution and fit to customer requirements

GPD APPROACH

GPD Technology offers complete end-to-end solutions with scalable performance to accommodate future growth in business activity, data volumes and newer technologies.

GPD will help you formulate the right solution from functional specifications, to the conceptual design and down to the implementation, support and training.

Our approach is to provide highly Integrated Solutions tailored to address the client's specific needs with embedded flexibility for evolution. Our offering includes:

- Consultancy
- Solution Design
- System Integration
- Project Execution and Management
- Technology Transfer: Training and User Empowerment

Our ability to perform is conditioned by:

- High quality Hardware from renowned providers
- In-house developed Software Solutions with high customizability and API Integration.
- Online platform accommodating a variety of Hardware technologies/products
- Excellent Support and Customer Service
- Keeping the Knowledge asset of **GPD** in synch with continuous Technology advances
- Infusing high degree of work ethics and integrity amongst company Personnel

LINES OF BUSINESS

GPD Technology is actively pursuing excellence in the following domains:

GPS Tracking - Solutions

A broad range of Solutions in application areas such as:

- Navigation and Mapping,
